PROFESSIONAL SUMMARY

Cybersecurity Analyst with hands-on experience in SOC operations, endpoint telemetry analysis, and vulnerability management across cloud and endpoint environments. Proven ability to analyze security alerts, validate findings, correlate file, process, and network telemetry, and document investigations using structured SOC workflows. Experienced in regulated environments requiring strong documentation, risk-based decision-making, and collaboration with IT and security teams.

CORE SKILLS

Security Monitoring & Incident Response • SIEM Log Analysis • Endpoint Detection & Response (EDR) • Vulnerability Management • Threat Hunting • CVE Research • CVSS Risk Scoring • MITRE ATT&CK • Identity & Access Management (IAM) • Security Documentation • Cloud Security Fundamentals

TOOLS & TECHNOLOGIES

Microsoft Defender for Endpoint • Microsoft Sentinel • Splunk SIEM • Tenable.sc • Nessus • Azure (VMs, NSGs) • Windows & Linux • Wireshark • Git/GitHub • Jira • Command Line • Ticketing Systems • Microsoft Office

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst – Vulnerability Management & SecOps (Intern)

LOG(N) Pacific – Remote

December 2023 – Present

- Executed authenticated and unauthenticated vulnerability scans across Windows and Linux systems using Tenable.sc and Nessus.
- Analyzed scan results, conducted CVE research, and prioritized remediation based on risk and exploitability.
- Produced detailed vulnerability reports including impact analysis, remediation guidance, and validation steps.
- Investigated security events using Splunk SIEM to support alert triage and SOC-style case workflows.
- Performed threat-hunting activities focused on brute-force attempts, persistence indicators, and abnormal system behavior.
- Applied MITRE ATT&CK techniques to contextualize findings and support escalation decisions.

- Maintained structured documentation to support audit readiness and operational transparency.
-

Help Desk Technician (IT & Security Support)

Dream Believe Achieve Strategies – Arizona

April 2025 – Present

- Provided first-line technical and security support for user access, authentication issues, and system troubleshooting.
 - Reset credentials, managed permissions, and enforced access control policies across web-based systems.
 - Documented incidents and escalated security-relevant issues to IT and cybersecurity teams.
 - Collaborated with infrastructure and security staff to improve response efficiency and system reliability.
-

Software Engineer (Apprenticeship)

Techtonica – Remote

September 2025 – December 2025

- Completed intensive full-stack JavaScript training with emphasis on React, Git workflows, and Agile collaboration.
 - Built responsive UI components and integrated APIs in a Vite/React environment.
 - Participated in pair programming, debugging sessions, and structured code reviews.
-

Phlebotomist Supervisor / Healthcare Operations

Quest Diagnostics / Synergy Laboratories / Lab Works – Huntsville, AL

April 2021 – April 2025

- Led teams in regulated healthcare environments requiring strict compliance, data accuracy, and audit readiness.
 - Trained staff on electronic systems, secure data handling, and HIPAA compliance.
 - Acted as on-site escalation point for system access issues, workflow disruptions, and data discrepancies.
 - Improved operational efficiency, reducing patient wait times by 25% and increasing processing speed by 30%.
-

CYBERSECURITY PROJECTS

- **Endpoint Telemetry & Threat Detection (Microsoft Defender):** Built and documented advanced hunting queries to detect suspicious file, process, and network activity using Microsoft Defender for Endpoint telemetry.
- **Vulnerability Management & Scanning (Azure + Tenable):** Deployed Linux systems, executed vulnerability scans, analyzed CVEs, and documented remediation impact and risk reduction.
